Why do a Information Technology Summer Internship at NU?

An IT summer internship can be a “win-win” situation for you and the company. It provides you with an opportunity to learn by doing meaningful on-the-job experience and opportunities to demonstrate your innovative ideas. As a valued member of our team, you will contribute by helping us problem-solve in a real-work environment. We’ll expose you to tasks and projects that will give you practical experience, which will help you to grow and move into a career in the future.

For Northeast Utilities, the program provides the company with talented IT professionals that could be candidates for permanent positions in the future. NU’s strategic focus on regulated business opportunities has strengthened its financial position. The company still has challenges to overcome, including a volatile energy marketplace, rising energy prices and meeting the increasing expectations of the customers and the communities we serve. IT will play an integral role in helping to meet these challenges.

About the NU Intern Summer Program

The IT Summer Internship Program is a three-month paid developmental program within NU’s IT organization.

Each intern will be assigned mentor. Your mentor will provide guidance on assigned projects and you acclimate to the company. Work assignments are coordinated by the assigned area product center manager and the mentor prior to the intern’s arrival. These assignments are required to be meaningful and challenging but at the same time not designed to be overwhelming.

You will also have the opportunity to participate in on-the-job and facilitated training opportunities sponsored by NU’s Human Resources department.

When does the Summer Intern Program start and how long does it run?

The program typically starts in mid-to-late May and runs through August.

What are some of the different types of positions available for an intern at NU?

NU has a wide range of IT opportunities spread across application development and support, infrastructure, and business service teams. Some of the job titles in these areas are:

- Business Systems Application Developer (software developer/engineer)
- IT Systems Engineer
- IT Security Engineer
- IT Business Analyst
- Network Systems Engineer
- Reporting Support Services

To Apply...

Visit: www.nu.com/jobs/internship

Applications for the IT Summer Internship Program will be accepted December through January. Apply on-line at www.nu.com/jobs/internship.asp.

On-site interviews will be conducted in January and February.

Final decisions and notifications will be made in February and March.

Orientation is in May.

Who is eligible for the Summer Intern Program?

Students entering their sophomore, junior or senior year of college are encouraged to apply. Successful candidates should be pursuing a degree in Computer Science, Management Information Systems or any other IT related field of study.

Where will the location of the internship be?

The majority of the internships will be located at our corporate facilities in Berlin, Connecticut.

Social Activities

Throughout the course of the program, interns will have the opportunity to get together to network and share their experiences with each other. IT and Human Resources periodically sponsor events throughout the summer.

Northeast Utilities

Northeast Utilities is a Fortune 500 company which operates New England’s largest utility system, serving more than two million electric and natural gas customers in Connecticut, western Massachusetts, and New Hampshire.
